AXAGON

AXAGON is an original Czech project created by company RealQ s.r.o. with Czech capital. It benefits from the long years of experiences and knowledges of its creators, who consistently use customer feedback to meet their needs. Sales of AXAGON brand began at the end of 2005, but the vision of that project has been matched by the creators' heads years before. It specializes mostly in products from the area of computer and mobile accessories, components, peripherals and multimedia. It aims to create an extremely compact and powerful range of products covering these areas and offer optimal solutions to customers looking for any product in these areas.

It delivers fast-paced not only products with the most cost-effective ratio, quality, performance and utility features, but as well as the latest technological innovations and exciting innovative products, products with high degree of integration of features or products characterized by highly functional and aesthetic design. It takes care of the complexity of the assortment offered in the given category, ensuring precise pre-sales and post-sale support of the products and, of course, also fulfilling all safety, technical, legal and environmental standards.

Products are designed for the Czech market as well as other European Union markets, which means not only very favorable prices for customers due to large series, but also a careful quality control of all products designed for the most demanding markets.

AXAGON brand is created by people with dozens of years of experiences in various areas of computer technology, who still enjoy the work and become as their hobby.

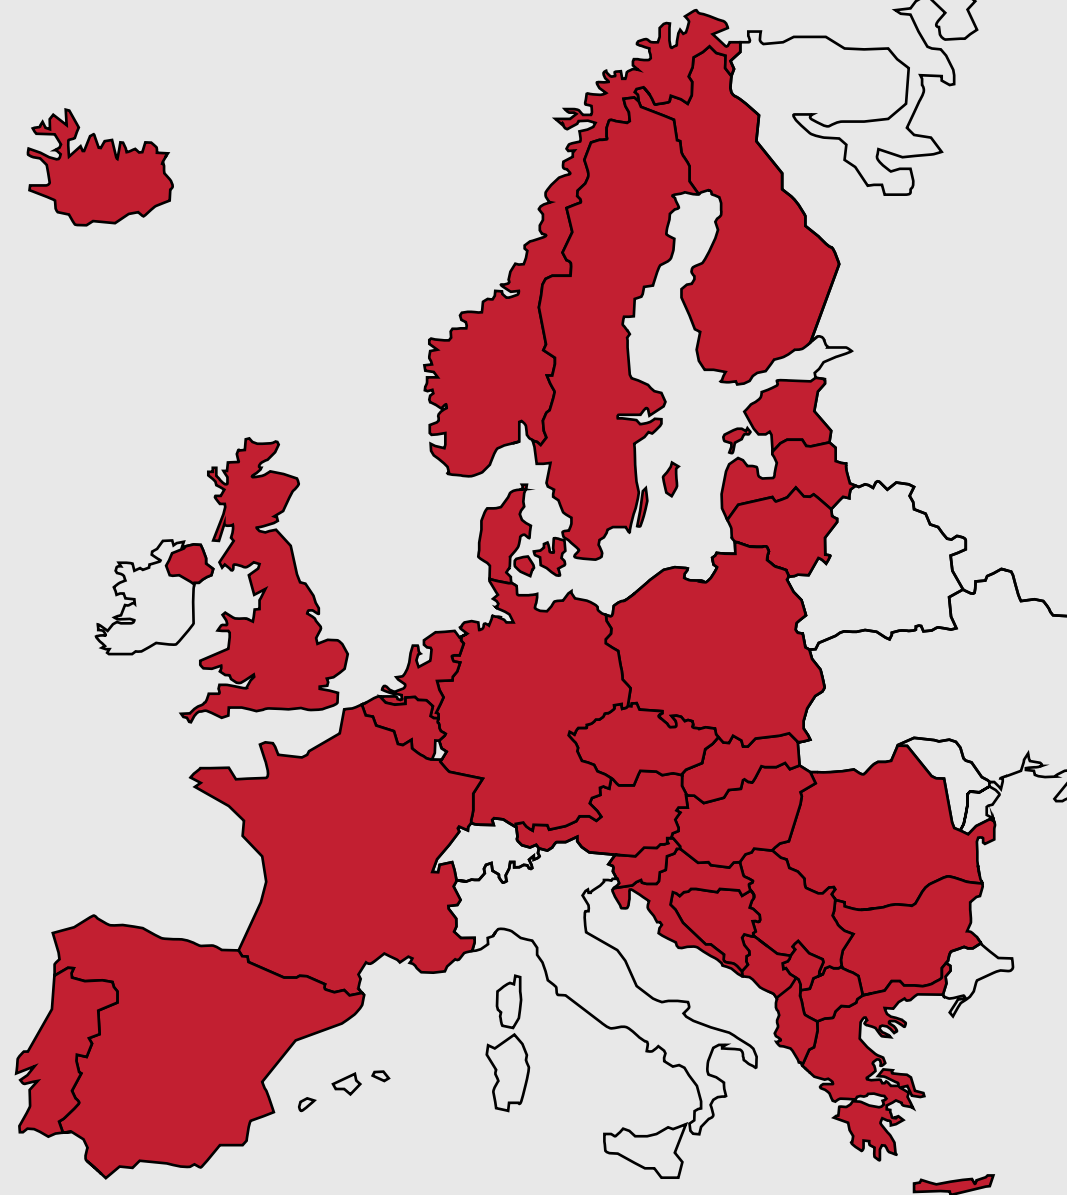

We are looking forward to a shared path to the future
